ENERGY STAR

THE BENEFITS OF BUYING A MATTAMY ENERGY STAR® HOME

mattamyhomes.com

WHAT IS ENERGY STAR®?

Since 1992, ENERGY STAR® has been recognized as one of the world's most trusted symbols for energy-efficient homes. Their signature blue badge represents a home that's both environmentally friendly and better quality.

When built to the latest standard by Mattamy, an ENERGY STAR® certified home is built to be about 20% more energy efficient than local building codes. For a home to get an ENERGY STAR® certification, the home is tested, inspected and evaluated by a third-party energy advisor to ensure that standards are met. Hence, choosing an ENERGY STAR® certified home is choosing one built to a higher standard.

Mattamy is proud to build new homes with the power to make a difference. We're committed to doing our best for your family, as well as the world you live in.

EMPOWERING SUSTAINABILITY TOGETHER

At Mattamy, we're committed to enhancing our homeowners' lives through sustainable initiatives in our homes and communities. ENERGY STAR® shares this commitment through energy-efficiency solutions for homeowners, which is why we've proudly partnered with them.

As the largest ENERGY STAR® homebuilder in Canada,*** we're committed to building to a higher standard to support both the environment and the homeowners who call our communities home.

Since 2006, Mattamy has built over 24,000 Energy Star® certified homes.

THE BENEFITS OF AN ENERGY STAR® CERTIFIED MATTAMY HOME*

Mattamy ENERGY STAR® certified homes are more energy efficient compared to the Building Code Standard. Choosing a new Mattamy ENERGY STAR® certified home means choosing a more comfortable living space built with energy-efficient enhancements including:

BETTER INDOOR LIVING

Your home will be more airtight than a typical new home, which helps to reduce drafts and cold spots. It also helps to keep dust, pollen and pests from getting inside. Energy-efficient windows and higher insulation levels also help to improve the overall comfort of the home, creating more balanced temperatures.**

ENERGY SAVINGS

An ENERGY STAR® certified home is built to be about 20% more energy efficient than a typical home. Every year, an ENERGY STAR® certified home saves the same amount of energy as running a refrigerator for 10 years.*

HELPING THE PLANET

By living in an ENERGY STAR® certified home, you're helping reduce greenhouse gases from being emitted into the planet every year and contributing to Mattamy's total number of reduced greenhouse gases.***

*According to the ENERGY STAR® efficiency standard developed by Natural Resources Canada.
**As compared to a minimum Ontario/National Building Code Home.
***As calculated by Building Knowledge Canada, representing Mattamy's current ENERGY STAR built homes.
